In the US, one laptop computer is lost every 53 seconds! You can save your files and prevent equipment loss now with a small active RFID tag from Purelink.

Purelink's anti-theft solution is a proven multi-layered protection system designed to keep your IT equipment under your control. As a part of our Real-Time Location System, the Anti-Theft Tamper-Proof Tracking Tag is a cost-effective wireless anti-theft device which you can rely on to keep your equipment where they belong.

Simply affix the tag on the equipment you want to protect! As a tracking device, the tag will set off an alarm if the asset leaves a predefined zone. Furthermore, an alarm will be triggered if the tag is removed from its associated equipment. The combination of these two alarm capabilities makes Purelink's Anti-Theft Tamper-Proof Tracking Tag a revolutionary security system for equipment protection. These features are standard with Purelink's PLK-VPS-10S Visibility Pack.

How does it work?

Using a Purelink PLK-VPS-10S Visibility Pack and Anti-Theft Tamper-Proof tags, an IT equipment protection plan can be implemented in 3 simple steps:

Step 1

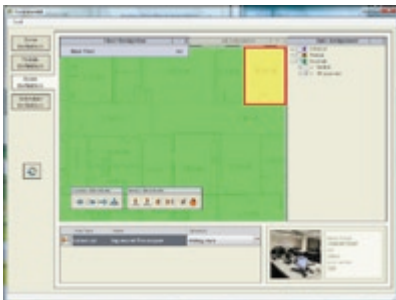

Peel off the backing from one side of the industrial-grade double-coated adhesive and affix it to the sensor side of the tag

Step 2

Peel the backing off the remaining side of the adhesive and affix the tag to a laptop, desktop, monitor or any other IT equipment you want to protect
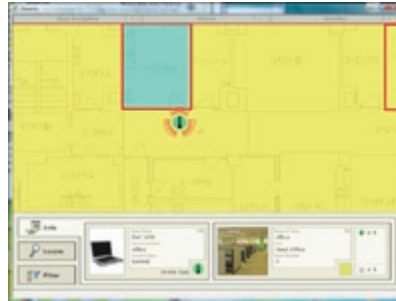

Step 3

Configure the appropriate software with the desired rule

Now that the configuration is completed, if a protect computer is removed from its location or if someone tries to removed the tag from the equipment, an alarm will be set off. These alarms are displayed in Bluefairy Observer, as well as Bluefairy Inspector. Moreover, these alarms can be pushed to smartphones, using SMS or e-mail.
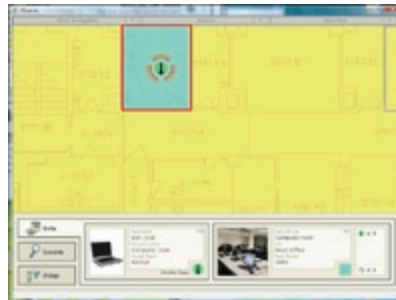

Scenario 1

The tag is leaving a zone it shouldn't leave

An exit alarm is set off in Observer

Scenario 2

Trying to remove the tag from a computer

An alarm is set off in Observer

Start protecting your vital IT equipment right now and save your investments. It's as simple as sticking a sticker on a computer! Contact Purelink today and ask for information about our visibility solution.
